

INSTRUCTOR GUIDE · V1 · 2026-06-20

Amp Academy — Instructor Guide

Run Amp Academy with a cohort: the consistent-platform teaching model, enrolling students, assigning courses, and tracking verifiable completion + verifiable video.

For instructors & program leads · IBEW / JATC / BASD / employer programs.

1 · The teaching model

Every Amp Academy course **looks and works the same** — tutor always bottom-right, identical navigation, the calculator behaves the same way. Students learn the interface **once** and carry it into every course: less hand-holding, faster starts. That consistency is why a program adopts Amp Academy as its **standard**, not a one-off.

The verifiable difference: most training video lets a student press play and walk away. Amp Academy gates completion on a **real assessment**, and video lessons require **active-recall checkpoints** — so “complete” means **learned**, and it’s recorded.

2 · Setting up a cohort

- 1 Create your cohort in the **edex Instructor Console** and add (or roster-import) students.
- 2 Assign the term’s courses (e.g., Journeyman NEC 2023 + the Multimeter quick-class).
- 3 Share the Campus link; students install and sign in to your cohort.
- 4 Watch progress and verifiable completion roll in as they work.

edex · Instructor Console (roster + gradebook)

Cohort: **BASD Demo Cohort** PREVIEW · SYNTHETIC DATA

STUDENT	COURSE	STATUS	SCORE	VIDEO ✓
Sample Student	Multimeter	✓ Complete	88%	✓
A. Demo	Journeyman 2023	In progress	—	—
B. Example	Journeyman 2023		91%	

		✓ Complete		✓
C. Trainee	Estimating	In progress	—	—

edex is **built and staged** but **not yet deployed with real student data** — student records activate only after counsel (FERPA/DPA) sign-off. Rows above are synthetic.

Preview UI · synthetic cohort. Activates with real students only after FERPA/DPA sign-off.

3 · What you can see

SIGNAL	WHAT IT TELLS YOU
Course progress	How far each student is through assigned material.
Assessment score	Earned score on each graded quiz (pass = certificate unlock).
Verifiable completion	A recorded, auditable mark that the student finished and passed.
Video checkpoints	Active-recall checks answered during video lessons — proof of attention, not playback.

4 · The tutor in your classroom

The Honest Tutor is a teaching aid, not an answer key. It cites the Code and defers to the printed NFPA 70 — reinforcing the habit you want: **look it up, confirm it**. It won't fabricate a value, so it won't teach a wrong one.

Honest Tutor · in a lesson

Light

NEC 2023 · Article 220 — Branch-Circuit, Feeder & Service Calculations

Dwelling Unit — General Lighting Load

General lighting load for a dwelling is computed at **3 VA per ft²** (220.12). The first 3,000 VA is taken at 100%, the remainder at 35% (220.42 demand factors)...

Lesson 4 of 12 · Sample Student

Honest Tutor

What demand factor applies to the first 10 kVA of dwelling general load?

For a dwelling's general lighting + receptacle load under the standard method, the first **3,000 VA** is at 100%, then 3,001–120,000 VA at 35%. Apply per Table 220.42.
→ NEC 220.42 · confirm against your printed NFPA 70 (NEC).

Thanks!

Representative UI · demo exchange.

5 · Certificates

When a student passes, Amp Academy issues a certificate with a verification id; for rostered cohorts these are auditable through the console.

earned a passing score of **88%** on the final assessment

Issued 2026-06-20 · verification id: AA-DEMO-7F3K · demo

Representative UI · demo certificate.

Student-record features (roster, gradebook, stored completion) are part of the optional **edex** backend — **built and staged but not yet live with real student data**. It activates only after your institution's counsel completes the FERPA / data-protection review. Until then, run the free courses; completion is local to the device.

Amp Academy is a study aid — **not a substitute for the printed NFPA 70 (NEC)** — and makes no accreditation, pass-rate, or endorsement claims.
