Amp Academy — Student Guide

Install Amp Academy, take a course, use the honest tutor and the verified calculator, pass a quiz, and earn your certificate — fully offline.

For learners · follow along with our demo, “Sample Student.”

1 · What Amp Academy is

A family of **free, installable, works-offline** electrician courses and tools — NEC Journeyman editions (2017–2026), Mastering the Multimeter, Residential Estimating, and a verified Article 220 Load Calculator — tied together by the **Campus**. No ads, no logins, nothing leaves your device.

Install it (takes a minute)

- 1 Open the Campus link your instructor sent (or amp-academy on the web).
- 2 Use your browser’s **Share / menu** → **Add to Home Screen**.
- 3 Launch it from your home screen like any app. **Signal is now optional**.

Representative UI · demo — real screenshot drops in at deploy.

2 · Your Campus

The Campus is home base — every course you're enrolled in, in one place, with your progress on each. Open one to pick up where you left off.

Representative UI · demo student ("Sample Student," BASD Demo Cohort).

3 · Lessons + the honest tutor

The **Honest Tutor** sits bottom-right on every course (learn it once, same everywhere). Ask it anything — it answers, **cites the Code section**, and tells you to confirm against your printed NFPA 70. **It will not invent a value.**

Thanks!

Representative UI · demo tutor exchange.

4 · The verified Load Calculator

It runs an NEC Article 220 dwelling load and **shows every step with its section reference** — so you can check it against your book and learn the method, not just get an answer.

Amp Academy · Load Calculator

Light

 **Load Calculator**
NEC Article 220 · shows every step

General lighting — 1,800 ft² × 3 VA	5,400 VA 220.12
Small-appliance circuits (2 × 1,500)	3,000 VA 220.52(A)
Laundry circuit	1,500 VA 220.52(B)
Demand: first 3,000 @100% + remainder @35%	6,750 VA 220.42
Range (8 kW, Col. C)	8,000 VA 220.55
Calculated service @ 240V	≈ 62 A → 100 A panel

Every line cites its NEC section so you can confirm it against your book. A **study aid** — verify against the printed NFPA 70 before real-world use.

5 · Quizzes & your certificate

Certificates are **earned** — you unlock one by passing the assessment, not by waiting out a timer. Miss the bar? Just retake it.

Quiz · Results

Light

Quiz passed — 88%
22 of 25 correct · passing threshold 70%. Your certificate is now unlocked.

Completion is **earned on the assessment**, not a timer. Miss the bar and you simply retake it — nothing unlocks until you actually pass.

6 · Offline & privacy

Amp Academy installs to your device and runs with **no signal**. **No logins, no ads**, and on the free courses **no personal data is collected**. If your school runs the optional rostered program, only your enrollment and completion are recorded — your school will tell you what applies.

Amp Academy is a **study aid** and is **not a substitute for the printed NFPA 70 (NEC)**. No accreditation, pass-rate, or endorsement claims. Always confirm code values against your current adopted edition.
